JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

V. *ExtraEt of a Letter from Mr. de Vallemont, &c. concerning a small Egg being found within an ordinary one, taken from the Journal des Savans of the 7th of Jan. 1696.*

IN the *Journal des Scavans* of the 7th of Jan. 1696. is an account of a small Egg of about 7 Lines from end to end, and $4\frac{1}{2}$ of bigness, which was included in a Hens Egg, which appeared to have nothing extraordinary on its outside, and which they were breaking to make an *Ommelette* of. The small Egg-shell was fastened to the shell of the greater by one of its Extremities.

Several Instances of the like nature are extant in Natural Historians.

London : Printed for Sam. Smith, and Benj. Wallford, Printers to the Royal Society, at the Princes Arms in St. Paul's Church-Yard. 1697.
